

Goats Prefer™ Direct-Fed Microbials

Why Use Goats Prefer™ Direct-Fed Microbials?

- All natural
- No antibiotics
- Fortified with Vitamins and Minerals
- Contains a source of live (viable) naturally occurring microorganisms
- Safe to use with Antibiotics

Suggested Use

Goats Prefer™ Probiotics can be used to provide a source of live, viable, naturally occurring microorganisms to maintain healthy, microbial balance in the digestive tract. For use on animals during shipping, adverse weather, overcrowding or ration changes, all of which can trigger a stress reaction in your animal. Also beneficial for newborn animals providing good microbials. Research and field trials show that probiotics can help maintain normal appetite, feed efficiency and daily gains. Goats Prefer™ Probiotics contain Inulin, a complex sugar which is a nutrient to the beneficial bacteria in the gut. Use as part of a prevention program.

Features

- A form that is available for rapid absorption into the digestive system.
- Replenishes beneficial microbial populations to help get animals back to a healthy state quickly.
- Maintains digestion so that the animal utilizes feed more efficiently.
- Maintains normal health and longevity of livestock.

Benefits

- All natural
- No milk withhold or slaughter withdrawal
- No residues

Package Sizes and Item Numbers

Goats Prefer™ Probiotic Power
1 lb. jar; 12 jars per case (Item #: 85-400)

Goats Prefer™ Probiotic Plus Paste
80 cc tube (dial tube); 12 tubes per case (Item #: 85-410)

Goats Prefer™ Probiotic Power

Probiotic Power is a stabilized source of Lactic Acid Bacteria including *Lactobacillus acidophilus* DDS-1 and certain vitamins. Administer to any animal at times of stress, which can occur during ration changes, birth, weaning, shipping, weather changes and following antibiotic treatment. Helps maintain normal appetite and digestion following stressful events.

Goats Prefer™ Probiotic Plus Paste

Probiotic Plus Paste provides Lactic Acid Bacteria including *Lactobacillus acidophilus* DDS-1 and vitamins to maintain normal appetite and natural immunity. Administer to goats at times of stress. Stress occurs at birth, during shipping, ration changes, weather changes and following antibiotic therapy.
